Note: If there are multiple self-employment activities, income from each activity must be calculated and averaged separately. Thus, a separate Schedule B must be completed for each activity.

Treatment of self-employment losses

If the result of averaging the self-employment income is a loss, if the self-employment activity is not a hobby, and if there is other income not related to the self-employment activity that produced the loss, the self-employment loss may be used to reduce the other income in certain circumstances. If applicable, complete either Section 1 or Section 2 to determine if self-employment losses may be used to reduce other income.

If less than three years were averaged, complete Section 1 only. If three, four, or five years were averaged, complete Section 2 only.
